

Visualization Selection

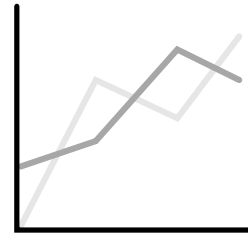

[Horizontal Bar Graph](#)

Horizontal bar graphs are used to compare data across categories. They are ideal for displaying a large number of categories with long labels.

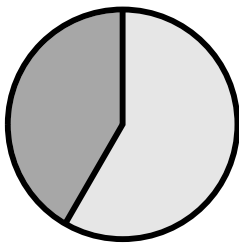

[Vertical Bar Graph](#)

Vertical bar graphs are used to compare data across categories. They are ideal for displaying a small number of categories with short labels.

[Time-Series Graph](#)

Time-series graphs are used to show data points over a period of time. They are ideal for displaying trends and patterns over time.

[Pie Chart](#)

Pie charts are used to show the proportion of different categories in a whole. They are ideal for displaying a small number of categories with large proportions.
